

HELPING ADMINISTRATORS BECOME PROFICIENT SCHOOL LEADERS

Assess & guide your district's school administrators with online tools that:

- Identify and qualify candidates
- Evaluate leadership skills
- Test decision-making abilities
- Enhance skills to achieve excellence

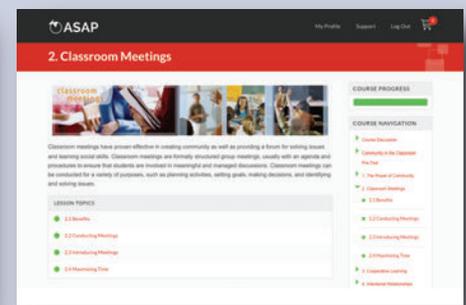

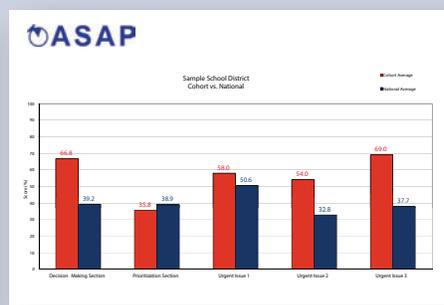

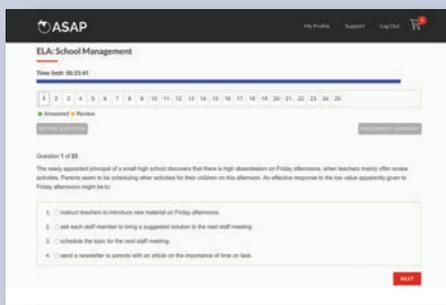

ASSESS, DEVELOP, SUCCEED

SHAPE ASPIRING AND EARLY-CAREER ADMINISTRATORS INTO HIGHLY EFFECTIVE SCHOOL LEADERS

The Accelerated School Administrator Program (ASAP®) provides Local Education Agencies (LEAs®) with detailed assessments and learning content to identify and enhance the skills of school leaders and leadership candidates.

ASAP® assessments and content are aligned to the Professional Standards for Educational Leaders published by the National Policy Board for Educational Administration (NPBEA), as endorsed by the CCSSO (formerly known as the ISLLC Standards).

EDUCATIONAL LEADERSHIP ASSESSMENT

The ELA consists of ten standards-based, timed assessments, each formatted as comprehensive multiple-choice questions. The ELA is a normed and validated series of tests providing a comparison of your cohort group to national averages.

The ELA quickly identifies the learning needs of users by pinpointing their specific areas for growth and improvement. Assessments query candidates' knowledge of all aspects of educational leadership theory and practice. Cohort members and district leaders receive timely, detailed, packaged reports with analysis and recommendations for addressing areas of improvement. The ELA can serve as both a pre- and post-assessment for ASAP cohorts.

INBASKET

Effective administrators are adept at prioritization and decision making. The InBasket assesses and engages the prioritization and decision-making abilities of cohort members with genuine, relevant and timely school-based scenarios. Animations, audio, visual and interactive features provide a dynamic learning experience. There are InBaskets in five leadership dimensions. Each can be used as a formative or summative assessment tool.

As individuals complete the assessment, a leadership style emerges. Participants and the program director receive objective and measurable feedback about prioritization, decision making and communication abilities in the chosen dimension.

LEARNING MODULES

ASAP course modules provide high-quality, interactive content related directly to the assessment reports provided to program directors. Eighteen distinct learning modules provide a minimum of 210 base hours of professional development (300 clock hours in some jurisdictions).

Each module is specific to skills within the leadership dimensions reported by the ELA. Multimedia-rich with research-based content and reference materials, the ASAP course modules include real-world assignments relevant to the workplace. ASAP modules qualify for Continuing Education Units (CEU) credits or applicable certification credits in most jurisdictions across the country.

CASE STUDIES & MORE: ASAP Case Studies challenge aspiring, newly promoted, and even experienced school leaders to exercise their skills in categories of leadership within specific domains such as instructional leadership, faculty development, organizational leadership, parent/stakeholder relationships, and ethical leadership. These tools, including ASAP Workbooks for local use by district cohorts, are available by annual subscription, or as part of an ASAP Academy which also provides one-to-one mentoring and professional learning retreats focused on student achievement and continuous school improvement.
